FORT WAYNE, we were joined by a deputation of eading citizens, the genial and courtly Mayor Randall at the head; a deputation whose ardor in our behalf not even a drenching rain could dampen. At the Fort Wayne depot we were met by a large concourse of citizers of every degree who welcomed us with a warmth of feeling and a genrous hospitality that could not be exelled by any people. There were private carriages for the whole party, mbering over two hundred persons, and the doors of as many private resiines were cast in a most pleasant place Editors Appeal: A recent trip to as I enjoyed rest at the elegant residence of Mr. Bass, (nephew of John M. Bass, Esq., of Nashville) who is the proprietor of one of the largest railrealize to what an extent the North- road car-wheel manufactories in the

liberal of employers. This is a trait the extraordinary recuperative power | the Northwest. Realizing the value of our own section, and the wonderful and dignity of labor, gentlemen at resources, by the development of the head of large establishments are which the South has risen from the ashes of war and out of the depths of immense establishments by turning despair, I could scarcely believe that them into stock concerns and issubunan energy in any part of the Wewere shown through Fort Wayne world could exceed it, or that it was and saw all its streets, its suburbs, its possible, under the most favored cir-cumstances, elsewhere to equal it. site of the old fort whence But I have learned otherwise. I old mad Anthony Wayne, of revolutionary fame, used to chastise the Pottowottamies. Fort Wayne, in chean lands, railroads, free schools 1860, had a population of 10,300, and and immigration the Northwest has now in 1871 is said to have 24,000; for grown, not alone in population, in agricultural wealth, but in manufactural wealth, but in manufactural with profit to their conductors. The tures and mechanics, to a degree ena-bling her people to be independent of and Chicago railway is the largest in the East and of Europe in many things, the town. It gives employment t 1500 men, and pays out \$300,000 pe and to make those parts of the month for material and labor. Then

impossible to build up a free and independent community except by the encouragement of a diversity of industrial pursuits, such as has insured for England the tribute of a world that every year needs more and more than 200 men, the products of whose the aid of mechanical appliances in the rapid murch of human develop-the rapid murch of human develop-there are woolen mills, planing mills, THE PEOPLE OF THE NORTHWEST, factory, and many other industries not satisfied with the wonderful the total of whose earnings is im found in the profound depths of a soll this manufacturing center, now which yields most abundantly, a reached by three trunk lines, with

mineral wealth which, by the aid of brawny arms and stout hearis, they skillfully fashlon into machines of extraordinary capacity, increasing facilities for manufactures that find a de- and culture. A noticeable feature here, mand as needy as their power to satis-trip through the northwest, was the number of commodious and beautius school buildings which in unexpected and eligible locations arose high above all others, attesting the universal dissemination of education. A fact worth recording in this conly increasing population demand- ful school buildings which in unexing aids and assistants in the pected and eligible locations arose was forced to have recourse to me- A fact worth recording in this conchanical devices and machines, while | nection, is that these common schools the South, stimulated by a world's are patronized by the rich as well as demand for cotton, enlarged her area of growth for that staple and saved of growth for that staple and saved vate schools for facilities, strictness from his vices the negro machine, not and thoroughness. Out of Fort more reliable or intelligent than those, which guided by the Northwestern morning, by special train on the Fort

houses maintained at the public ex- ple, and entertained in the same genneighbors in the States and na-tions whence they emigrated to the West. Years of travel had prepared me in some South, where people are so impulsive measure for startling changes. I had not been in the northwest in fifteen years, and knowing something of the energy and will-power of the people are so impulsive this city to Louisville and Cincinnati, and returned in the shape of barrels and buckets. Memphis should utilize their throats with a bread a wealth lying at her very doors, and knife. He then committed suicide, energy and will-power of the people are so impulsive this city to Louisville and Cincinnati, and returned in the shape of barrels and buckets. Memphis should utilize their throats with a bread a wealth lying at her very doors, and knife. He then committed suicide, cutting his own throat. He had once energy and win-power of the people of the section, I was ready to believe extraordinary things of them, and to extraordinary things of them, and to no less than nine railroads extending on less than nine railroads extendin realize an advance commensu-rate therewith, but I confess myself in as many different directions, north the leading manufacturers of and south. Its population is estimated at 18,000, to satisfy the children of

our way lay through a country familier to most travelers, either for business or pleasure. Manufactures everywhere keeping pace with agricultural feasible enterprise no matter who or development: schools, academies, col- how many may be earliched by itdevelopment: schools, academies, colleges and churches in all directions dotting the landscape—beautifying a picture created from the confusion of nature by labor, skill and industry.

From the Union depot of Indianapolis there goes out every day seventy—olis the gain by this?" but, "Is the question being with them, not there are possible to accrue to the community from it?" If so, they give money and any other help it may need. What a lession is there two trains. The train-bell and steam here for the people of Memphis-what whistle never cease to sound, and the smoke from the modern lever which moves a world never ceases to ascend to heaven a perpetual reminder of the ceaseless vigilance, the extraordinary capacity and wonder-producing energy of a people who are dueling energy of a people who are served and an extraordinary capacity and wonder-producing energy of a people who are served and an extraordinary capacity and wonder-producing energy of a people who are served and an extraordinary capacity and wonder-producing energy of a people of Memphis—what a lesson in all that I saw of manufacturing and mechanical enterprises, which in every case increase the value of the raw material they work up more than one third, to that extent, adding to the permanent wealth of the communities so for the people of Memphis—what a lesson in all that I saw of manufacturing and mechanical enterprises, which in every case increase the value of the raw material they work up more than one third, to that great and are destined to be greater. fortunate as to enjoy them. The Think of seventy-two trains each day, coming from and going to all parts of the Union, and then try to in a way and on a scale worthy of reflect upon the effect this must have in spreading abroad a cosmopolitan State. It is more than self-support-spirit, in the diffusion of knowledge ing, at the same time that the convicts and the quickening of the impulses are being educated in and employed at

Can be sourced in Mem sources of wealth. In private carriages drawn by such horses as only poplar, \$8 to \$10 per thousand feet; Kentucky can match, we were driven cypress, \$10; oak, \$15. Red gum, the evidences of this wonderful devel-opment, and witnessed the taste and opment, and witnessed the taste and opment, and witnessed the taste and opment and unsurpassed facture of cheap furniture, cost \$6 per who, as a noted manufacturer of Cincinnati remarked to me, were impatient to surround themselves with every means of personal and commercial improvement known to their old neighbors in the States and named the beautiful cemetery. A public dinner was the closing part of a programme that was full of good things. At this there were many interchanges of good fellowship and the beautiful cemetery. A public dinner was the closing part of transportation. Its density is such that it will not float. With every species of timber filling interminable forests on every hand, Memphis our common country were very generally expressed. It was a very hearty worth of territoria. skill of this great people-of a people, suburbs and the beautiful cemetery. thousand feet. Sycamore

had made to conjure for myself a picture of the condition of this great section. From Louisville to INDIANAPOLIS, which there are now of the best appointed and most elegantly constructed school-houses to be found in the United States. The people are thrifty, industrious and farital invested in manufactures here in ST. Louis, June 19.—T. G. Griffin, agent for the choctaw and Chickasaw Indians, arrived here to-day from the council in the Indians, arrived here to-day from the council in the Indian Territory. The minuter of hands employed to 59,827, as compared with 30,288 in 1880, and the value of the products, after manufacture, to \$127,559,020. Thus these 59,827 hands, by the aid of machinery, increased the value of the raw material \$61,419,936, or nearly double, and ten million more than the active capital employed. Does this not tell the story of the value of the direct foreign importations of Cincinnati were last year \$51,226, to cheese, and steamboats, 478, with a tonnage of the St. Lynn, agent for the Creeks and James P. Hoag, in charge of the affiliated tribes of the charge of the affiliated tribes of the charge of the stamboats, 478, with a tonnage of the charge of the Creeks and determined the summer and a final decisary.

The smoke from hundreds of chimneys has already killed the fruit of stabbed the sargeant of the guard. A soldier immediately fired on Satank, ton factories, railroad car factories, engine and machine shops, and woollen manufactories, all attest the extent to which this great railroad center has so rapidly grown. Added to these are an increasing wholesale trade in all
